Force Majeure from Miwon

On September 27, Miwon, the producer of MIRAMER products, has issued a declaration of Force Majeure (FM) for TMP related products until further notice. (Please find attached the official communication from Miwon)

Although the impact on the supply of MIRAMER is not yet fully known, RAHN needs to evaluate the impact on other TMP related products. We will keep you informed about the effect on our deliveries to you and any further progress as soon as we will receive the necessary information.

During the Force Majeure, RAHN will continue with a fair and reasonable allocation of the available quantities that can be supplied to our regular buying customers.

We deeply regret the difficult and unprecedented situation this Miwon FM presents to our customers. Please be assured that we will do our best to mitigate the impact that this situation might have on your business.

Yours sincerely,

Xavier Marguerettaz, PhD
Vice President EnergyCuring
